DETAILED ACTION

1. This Office Action is in response to Amendments and Remarks received 10/26/2006. Per Applicant's request, claims 1-15 have been amended. New claims 16 & 17 have been added. Claims 1-17 are pending. The Specification Title has been amended.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with James J. Livingston, Reg. No. 55,394 on 01/22/2007.

Claims 16 and 17 are to be amended as follows:

Claim 16 (Currently Amended), insert following line 7, as follows:

structure and the arrangement of the data items in the memory; and

optimizing memory requirements for compiling or generating a data item dictionary by
outputting a program in which the plurality of unused data items are merged into the new data item.

Art Unit: 2191

Claim 17 (Currently Amended), insert following line 7, as follows:

on the hierarchical level in the hierarchical structure and the arrangement of the data items in the memory, and optimizing memory requirements for compiling or generating a data item dictionary and outputting a program in which the plurality of unused data items are merged into the new data item.

Allowable Subject Matter

3. Claims 1-17 are allowed.
4. The following is an examiner's statement of reasons for allowance:

Regarding independent claims 1, 13, 14, and 15 (and similar wording in independent claims 16 and 17), as Applicant has noted on page 9, last paragraph, through page 10, first paragraph, Choi, and other cited prior arts, taken alone, or in combination fail to disclose:

“the number of unused data items is reduced by merging a plurality of unused data items forming a data item having a hierarchical structure into one data item based on the hierarchical level in the hierarchical structure and the arrangement of the data items in the memory; the program is optimized such that the necessary memory requirement during compilation or generation of a data item dictionary is reduced.”

Moreover, evidence from modifying the prior art teachings by one of ordinary skill level in the art was not uncovered so as to result in the invention.

Thus, all remaining dependent claims, claims 2-12, are allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
